

I want to say that Air 1 has been a necessary part of our community. It is the only station that caters to and meets the needs of families with children under the age of 18. This is huge market. There are plenty of radio stations in our region and each of them meet a certain demographic, however Air 1 is the only that consistently offers programming that is suitable for children. Taking Air 1 off of the air would be like shutting down Nickelodeon- many parents would be upset. Thank you
